COMMENTARY

Over the past year, the Consumer Staples sector has significantly lagged the World Index +3% vs +18% on a total return basis. However, this overstates the average performance which was helped by sector giants, Costco's +51% (\$365bn mkt cap) and Walmart's +31% (\$551bn). Contrast that with two of the worst performers (and far smaller companies), Walgreens Boots Alliance -58% (\$10bn) and Remy Cointreau -51% (€3.7bn) and you can easily see the outsized impact of the giants in market cap weighted sectors.

We like to look for potential opportunities in unloved sectors, but this requires detailed analysis because "the market" is often "correct" and a lower share price does not automatically mean the company offers value – Walgreen's declining operational performance and large debt load seem to us to be valid reasons for their share's poor performance.

So why has the Consumer Staples sector underperformed the World Index? Many of these companies increased prices during the COVID period, citing inflation, but in recent quarters we've seen evidence of the consumer now wanting "value" and trading down to "private label", pressuring the growth of some consumer brand companies. Hard liquor companies like Diageo and Brown-Forman are suffering from declining sales in keeping with the trend of fewer people drinking alcohol these days, and lastly Consumer Staples companies are less "exciting" to own than technology companies in days when technology shares were rising 2% every day.

However, within this space, we have been building a few positions and are now substantially overweight this defensive sector. One of these holdings is Molson Coors, one of the world's largest brewers with brands such as Coors Lite, Miller Lite, Carling and Madri Excepcional. In 2016 MolsonCoors exercised their right to acquire SABMiller's 58% stake in their Joint Venture, MillerCoors, which they funded with \$9bn of debt. However, rather than gear up their balance sheet during times of low interest rates like many other US listed companies, this conservative management team have repaid \$6.2bn of this debt from cash generation. We like conservative management teams. Beer is less susceptible to private label erosion and they benefitted from the consumer boycott of Bud Light helping them grow sales in a difficult market. Despite growing earnings by 34% over the past year, the share price has fallen 22% and today trades at less than 10x earnings and offers a 3% dividend yield. A defensive company like MolsonCoors is just what we want in these turbulent times.

The TER is a measure of how much of the Fund's assets are relinquished as payments for services rendered in the administration of the Fund. Transaction Costs are a measure of the costs incurred in buying and selling the underlying assets of the Fund. Both the TER and TC are expressed as an annualised percentage of the average Net Asset Value (NAV) of the Fund calculated over periods of

(1) Three years. TER measurement period 1 August 2021 - 31 July 2024. Average annualised NAV over measurement period \$108,538,807

(2) One year. TER measurement period 1 August 2023 - 31 July 2024. Average NAV over measurement period \$182,584,898

(3) Latest month. TER measurement period 1 August 2024 - 31 July 2024. Average NAV over measurement period \$300,583,585 and TCs calculated using average TCs over previous 3 months, annualised.

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER

NOTES AND DISCLAIMERS

UCITS funds are required to calculate an Ongoing Charges Figure (OCF). It is a measure of the costs of operating the Fund. It is calculated in accordance with a methodology published by European regulators. The OCF of the Fund was 1.30%, calculated based on operating expenses of the Fund for the 12 month period ended 31/12/23 as a percentage of average Fund net assets of \$88.9m over the same period. The OCF includes all fund operating expenses for the USD, GBP and EUR investor classes, but excludes the 0.5% payable to the financial intermediary for the USD Advisor class.

The OCF figure is not applicable to the USD Institutional class. The Investment Manager has agreed with the Fund to rebate a portion, or all, of the Investment Management Fee attributable to the USD Institutional Class in order to facilitate the capping of the Capped Fees incurred by Shareholders in USD Institutional Class at an annualised 1.00%, subject to certain limitations. Please refer to the prospectus of the Fund for further details.

The OCF methodology does not include broker commissions, which were an additional 0.22% over the aforementioned period.

The Fund's benchmark is the MSCI World Index, a broad global equity benchmark that represents large and mid-cap equity performance across 23 developed markets. It covers approximately 85% of the free float-adjusted market cap in each country and does not offer exposure to emerging markets.

The Fund is actively-managed and its investment objective is to outperform the MSCI World Index* and to provide capital growth over a medium to long-term time horizon. The Investment Manager applies a bottom-up, "valued-based" research-driven stock picking method.

The USD Advisor class carries an additional 0.5% p.a fee which is paid to the financial intermediary.

The Ranmore Global Equity Fund GBP and EUR classes are not currency hedged classes. The difference between the returns in these classes and the USD class is due only to changes in the GBP/USD and EUR/USD exchange rates over the measurement period.

Net Asset Value per Share prices shall be published on the Business Day immediately succeeding each Valuation Point on www.bloomberg.com. South African investors

Ranmore Global Equity Fund plc is approved in terms of section 65 of the Collective Investment Schemes Control Act (2002) for marketing and distribution in South Africa. This factsheet is a Minimum Disclosure Document (MDD) as required by the Financial Sector Conduct Authority (FSCA) of South Africa.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of shares in the Fund may go down as well as up, and past performance is not necessarily an indication of future performance or returns. Neither Ranmore Fund Management Ltd nor Ranmore Global Equity Fund plc provides any guarantee with respect to capital protection of the Fund's returns. Collective Investment Schemes trade at ruling prices and can engage in borrowing. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

Ranmore Global Equity Fund plc is an accumulation fund. As such, there have been no distributions over the past 12 months.

Highest return over any rolling 12-month period: 97.7%. Lowest return over any rolling 12-month period: (19.7%)

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

The Total Expense Ratio (TER) is a measure of how much of the Fund's assets are relinquished as payments for services rendered in the administration of the Fund. Transaction Costs are a measure of the costs incurred in buying and selling the underlying assets of the Fund. Both the TER and TC are expressed as a percentage of the daily NAV of the Fund calculated over a period of three years on an annualised basis.

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

A schedule of fees and charges and maximum commissions is available on request from the manager.

The Morningstar Rating is an assessment of a fund's past performance – based on both return and risk – which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. The Fund's USD Investor Class has received an Overall 5-star rating as at 2/4/2024.

FE fundinfo

FE fundinfo Crown Fund Ratings enable investors to distinguish between funds that are strongly outperforming their benchmark from those that are not.
